HAO WANG

National Laboratory of Pattern Recognition, Chinese Academy of Sciences
jackw7308@gmail.com

EDUCATION

The University of Edinburgh, Edinburgh, UK *2018 - 2019*
MSc with Distinction in Informatics, Nov. 2019
Supervisor: Robert B. Fisher

Högskolan i Skövde, Skövde, Sweden *Sept. 2016 - Jan. 2017*
Exchange Student in Informationsteknologi
Concentration: Operating Systems, System Administration

Beijing University of Posts and Telecommunications, Beijing, China *2014 - 2018*
B.Eng. in Telecommunications Engineering, June 2018
Supervisor: Aidong Men

SKILLS

Programming Languages: Python, MATLAB, C/C++, Java, VHDL, Verilog, Assembly Language

Tools: PyTorch, Tensorflow, OpenCV, Dlib

Others: Linux, Git, SQL, LaTeX, FPGA, Arduino, Raspberry Pi

ACADEMIC PROJECTS

Gender Identification from 3D Facial Surface Model Feb. 2019 - Aug. 2019
Dissertation for Master's degree

· Proposed a novel method on 3D facial gender identification with machine learning & conformal mapping
· Evaluated the proposed method and obtained competitive performance (accuracy over 88%)

Action Recognition Model with First-Person Videos Jan. 2019 - Mar. 2019

· Evaluated third-person action recognition methods with first-person datasets
· Compared the differences between the third and first-person methods
· Proposed and studied a new model combining MobileNet and Two-stream Pyramid

Image Super-Resolution with Convolutional Neural Network Dec. 2017 - June 2018
Dissertation for Bachelor's degree

· Realized the subpixel-based image super-resolution method with pixel shuffle
· Tested the model on both image and video datasets

RESEARCH EXPERIENCE

National Laboratory of Pattern Recognition, CASIA Oct. 2019 - Present
Research Intern *Beijing, China*

· Advisors: Xiangyu Zhu, Zhen Lei
· Projects: Optimization on fine-grained 3D Face Reconstruction

Next Generation Internet Research Center, BUPT May 2017 - Oct. 2017
Undergraduate Research Assistant *Beijing, China*

- Advisor: Yang Liu
- Projects: Optimization on DASH-based video service in high-speed railway networks with stochastic methods; Network flow variation detection with mobile crowd sensing
